### STRATEGY OVERVIEW

The information herein reflects the underlying holdings of the fund. Investors will acquire shares in the fund and will not invest directly in the underlying assets. Pzena actively manages the fund, employing a classic value investment philosophy. The firm seeks to buy good businesses at low prices, focusing on companies underperforming their historically demonstrated earnings power. The investment team performs fundamental research to determine whether the problems that caused the earnings shortfall are temporary or permanent. If a company meets the investment criteria after the in-depth research process is complete, the fund's portfolio managers determine through collaborative discussion and unanimous decision if the company should be included in the portfolio. Pzena integrates environmental, social and governance (ESG) considerations into its investment process, including assessing material ESG risk and opportunities as part of fundamental analysis and engaging with portfolio companies where relevant. The fund also discloses under Article 8 of SFDR, applies exclusionary screens, and manages to a carbon target.

### DISCLOSURES

Pzena Investment Management, LLC, the investment manager of the fund, is located at 320 Park Avenue, 8th Floor, New York, NY 10022 and is a registered investment adviser registered with the United States Securities and Exchange Commission.

Past performance does not predict future returns. The value of your investment may go down as well as up, and you may not receive upon redemption the full amount of your original investment. Investments may be in a variety of currencies and therefore changes in rates of exchange between currencies may cause the value of investments to decrease or increase.

All investments involve risk, including loss of principal. Investments may be in a variety of currencies and therefore changes in rates of exchange between currencies may cause the value of investments to decrease or increase. The price of equity securities may rise or fall because of economic or political changes or changes in a company's financial condition, sometimes rapidly or unpredictably. Investments in foreign securities involve political, economic and currency risks, greater volatility and differences in accounting methods. These risks are greater for investments in Emerging Markets. PIM's strategies emphasize a "value" style of investing, which targets undervalued companies with characteristics for improved valuations. This style of investing is subject to the risk that the valuations never improve or that returns on "value" securities may not move in tandem with the returns on other styles of investing or the stock market in general.

Fund returns are benchmarked to the MSCI ACWI Index - Net (the "Benchmark"). The Benchmark is used for comparative purposes only. The MSCI ACWI Index - Net captures large and mid-cap representation across 23 Developed Markets and 24 Emerging Markets countries. The index covers approximately 85% of the global investable equity opportunity set. The Benchmark cannot be invested in directly. The performance of the Benchmark reflects the reinvestment of dividends net of withholding tax rates. The Fund's performance reflects the deduction of all Fund fees and expenses and reflects reinvested dividends (different share classes may vary). The Fund is significantly more concentrated in its holdings and has different sector and regional weights than the Benchmark. Accordingly, the performance of the Fund will be different from, and at times more volatile, than that of the Benchmark.
