Lowest Risk — Highest Risk

The summary risk indicator (SRI) is a guide to the level of risk of this product compared to others. It shows how likely it is that the product will lose money because of movements in the markets. The indicator is based on a scale of 1 (lower risk, typically lower reward) to 7 (higher risk, typically higher reward). The lowest category does not mean risk free. The risk category of the Fund is not guaranteed and may change over time. Historical data and the methodology used may not fully reflect all potential future risks. STRATEGY OVERVIEW

The information herein reflects the underlying holdings of the fund. Investors will acquire shares in the fund and will not invest directly in the underlying assets. Pzena actively manages the fund, employing a classic value investment philosophy. The firm seeks to buy good businesses at low prices, focusing on companies underperforming their historically demonstrated earnings power. The investment team performs fundamental research to determine whether the problems that caused the earnings shortfall are temporary or permanent. If a company meets the investment criteria after the in-depth research process is complete, the fund's portfolio managers determine through collaborative discussion and unanimous decision if the company should be included in the portfolio. Pzena integrates environmental, social and governance (ESG) considerations into its investment process, including assessing material ESG risk and opportunities as part of fundamental analysis and engaging with portfolio companies where relevant. The fund also discloses under Article 8 of SFDR, applies exclusionary screens, and manages to a carbon target.

DISCLOSURES

Pzena Investment Management, LLC, the investment manager of the fund, is located at 320 Park Avenue, 8th Floor, New York, NY 10022 and is a registered investment adviser registered with the United States Securities and Exchange Commission.

Past performance does not predict future returns. The value of your investment may go down as well as up, and you may not receive upon redemption the full amount of your original investment. Investments may be in a variety of currencies and therefore changes in rates of exchange between currencies may cause the value of investments to decrease or increase.

All investments involve risk, including loss of principal. The price of equity securities may rise or fall because of economic or political changes or changes in a company's financial condition, sometimes rapidly or unpredictably. PIM's strategies emphasize a "value" style of investing, which targets undervalued companies with characteristics for improved valuations. This style of investing is subject to the risk that the valuations never improve or that returns on "value" securities may not move in tandem with the returns on other styles of investing or the stock market in general.

This document should be read in conjunction with its prospectus and the relevant Key Investor Document(s) depending on your jurisdiction, either the PRIIPS Key Investor Document or UCITS Key Investor Information Document (the "KID(s)"). All transactions should be based on the latest available prospectus and KID which contains more information regarding the charges, expenses, where the funds are authorised for sale and risks involved in your investment.

The decision to invest in the fund should take into account all of the fund's characteristics and objectives as described in its prospectus or other fund documentation. Further detailed information regarding the Fund, including Prospectus, Supplements, KIDs and latest annual reports is available free of charge at www.pzena.com. Pzena Investment Management Europe LTD, the appointed fund manager, is authorized and regulated as a management company by the Central Bank of Ireland under the UCITS Regulations and is located at Fitzwilliam Hall, Fitzwilliam Place, Dublin 2, D02 T292, Ireland.

Fund returns are benchmarked to the Russell 1000 Value® index (the "Benchmark"). The Benchmark is used for comparative purposes only. The Russell 1000 Value® Index measures the performance of the large cap value segment of the US equity universe. It includes those Russell 1000® companies with lower price-to-book ratios and lower expected growth values. The Benchmark cannot be invested in directly.
The performance of the Benchmark reflects the reinvestment of dividends net of withholding tax rates. The Fund's performance reflects the deduction of all Fund fees and expenses and reflects reinvested dividends (different share classes may vary). The Fund is significantly more concentrated in its holdings and has different sector and regional weights than the Benchmark. Accordingly, the performance of the Fund will be different from, and at times more volatile, than that of the Benchmark.
